## [I. General Information of Beijing Jiaotong University]

Established in 1896, Beijing Jiaotong University (BJTU, formerly known as Northern Jiaotong University) is a multi-disciplinary national key university, leading in information and management disciplines and featuring traffic and transportation science and technology. It is one of the first institutions authorized to confer master's and doctoral degrees. Over the past century, the university has become an important base to turn out talents, especially outstanding talents in information technology and urban rail transit, for the economic and social development of China. Beijing Jiaotong University attaches great importance to the international education so as to bring out the power of a multidisciplinary system with bachelor, master, doctoral programs and exchange programs in the fields of engineering, management, economy, science, arts, law, and philosophy. A variety of scholarships are available for international students, such as Chinese Government Scholarship, Confucius Institute Scholarship, Beijing Municipal Government Scholarship and BJTU Scholarship for International Students. In 2018, there were over 2,200 international students from 120 countries studying at BJTU. BJTU graduates have very good job opportunities. Some of them choose to work in their home countries and embassies while others are hired by internationally renowned companies such as IBM and BMW. In addition, more and more international students would like to work in Chinese-funded companies including Sinopec, CRBC, CRCC, Huawei, and Baidu. And these days, there are quite some of students choose to start their own business whether in China or in their home countries.

BJTU has two campuses (Beijing Campus and Weihai Campus), located in Haidian District, Beijing and Weihai, Shandong Province respectively. Enjoying an advantageous location, Beijing Campus is close to downtown with convenient transportations. It also has abundant rooms equipped with good facilities to accommodate students. As an international campus, Weihai Campus is only 5.5 kilometers away from beach with beautiful environment and fresh air. It provides the students with excellent campus accommodation at lower cost. Weihai campus mainly devotes to the preparatory programs of international students and Chinese-foreign cooperatively-run education.
